1. The restriction requirement is withdrawn in view of the prior examiner's not separating the claimed fiber producing method from the claimed processes of claims 1-9. The non-elected invention would therefore require the search of claim 10.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-31 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No.

5. Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No.

Everhart discloses the instantly claimed method at the abstract; column 1, lines 52-68; column 2, lines 43-68; column 3, lines 1-68; and the remainder of the document. It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the instantly
